PERMIT NUMBER: ACT/015/032

DATE OF INSPECTION: 2/23/95

(Comments are Numbered to Correspond with Topics Listed Above)

1. PERMIT -

The Mining and Reclamation Permit of the operator and the PFO were compared against each other. It was found that several maps and text needed to be updated in the PFO's copy of the permit. Operator copied current text and implemented into plan. Maps will be implemented as soon as possible.

4a. DIVERSIONS -

The diversions were being cleaned out during and prior to the inspections. Water was flowing through the ditches and sediment was being cleaned out.

b. SEDIMENT PONDS -

The sediment pond was not discharging during the inspection but possibly could, unless the water is pumped back into the mine. The permittee has permission to pump water into the mine.

The sediment pond showed no signs of hazardous conditions existing.

Note: this inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
